

ESS Partner Day in Romania

EUROPEAN SPALLATION SOURCE

The European Spallation Source is a Partnership of 17 European Nations committed to the goal of collectively building and operating the world's leading facility for research using neutrons by the second quarter of the 21st Century. ESS, the European Spallation Source, will be a major user facility at which researchers from academia and industry will investigate scientific questions using neutron beams. Neutron methods provide insights about the molecular building blocks of matter not available by other means. They are used for both basic and applied research.

*ESS and IFIN-HH invite you to a presentation of this large European project
in Bucharest-Magurele, IFIN-HH Conference Hall, Thursday, April 24, 2014, 11⁰⁰*

Contact Person:

Cristian Cristescu
