

FAIR Experiment	PANDA
Project Title	Strong interaction studies in antiproton annihilation (SISTINA)
Stage I	Annual report - 2014

Experimentul PANDA (Anti-Proton ANnihilation at DArmstadt)

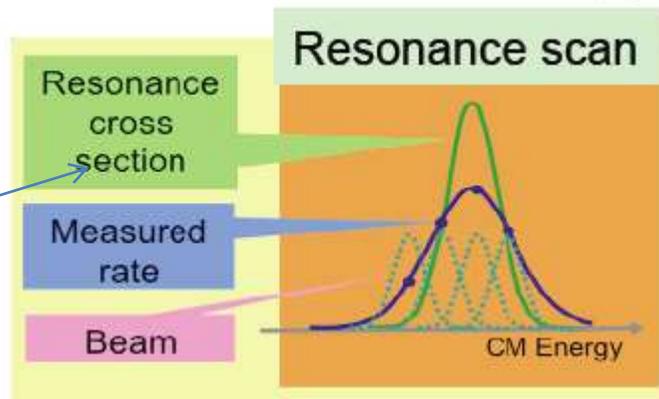

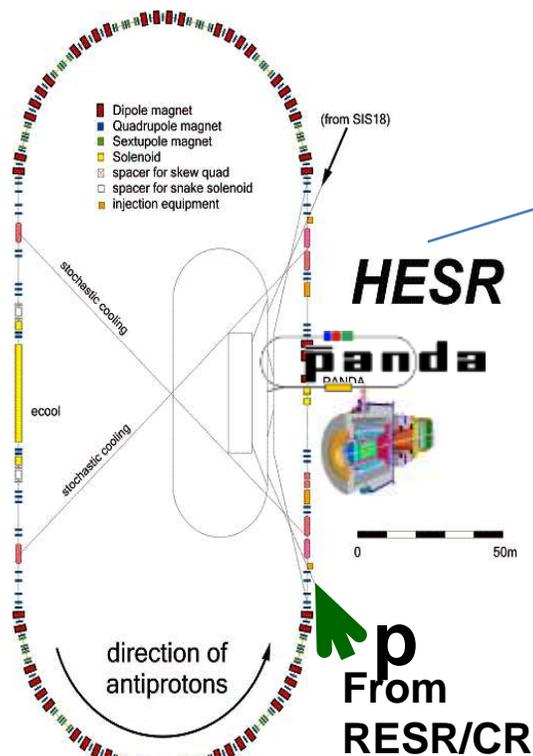

- Colaborare între **67 Institute și Universități** din **18 țări** (Australia, Austria, Belarus, China, Franta, Germania, India, Italia, Polonia, Romania, Rusia, Spania, Suedia, Elvetia, Thailanda, Olanda, USA, UK);
- **482 membrii.**

Facility for **A**ntiproton and **I**on **R**esearch

Experimentul PANDA

Experimentul PANDA este un experiment proiectat pentru a aduce contribuții pe trei mari direcții de cercetare din domeniul fizicii particulelor elementare: spectroscopie, structură și interacții ale particulelor.

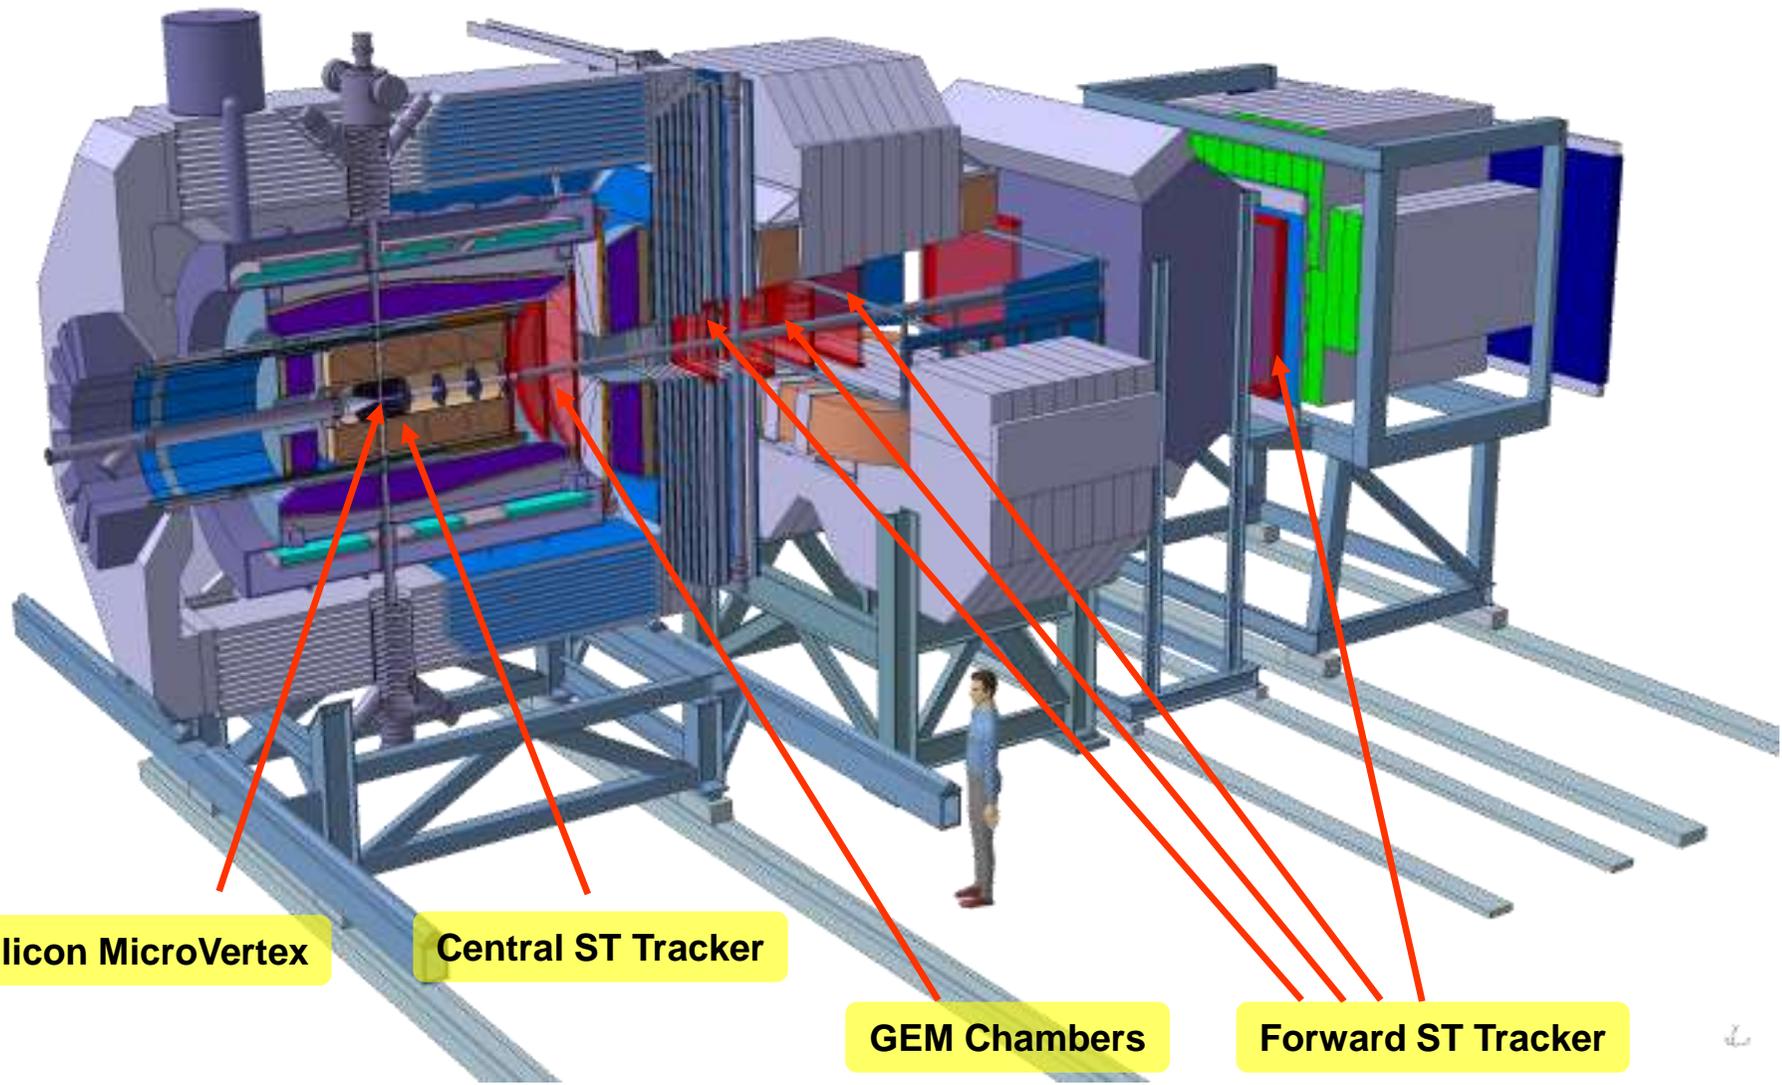

$p_{beam} = 1.5 - 15 \text{ GeV}/c$
 $2.3 \leq \sqrt{s} \leq 5.5 \text{ GeV}$
HESR: Rezoluție în masă de
 aprox. 30KeV (FERMILAB ~
 240 KeV)

În IFIN-HH DFPE avem experiența pe partea de:

- Spectroscopie particule cu charm (DUBNA, FERMILAB, CERN);
- Atomi exotici (în PANDA se are în vedere și efectuarea unui studiu al atomilor hiperonici Ξ^-)

PANDA tracking sub-systems

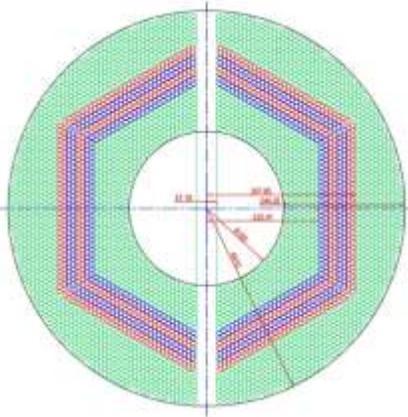

Silicon MicroVertex

Central ST Tracker

GEM Chambers

Forward ST Tracker

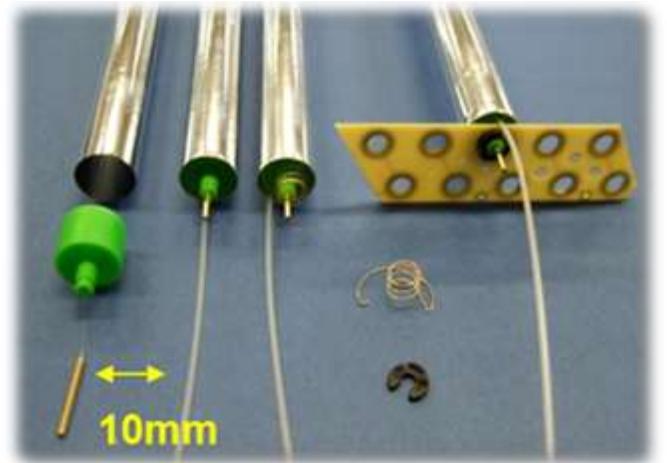

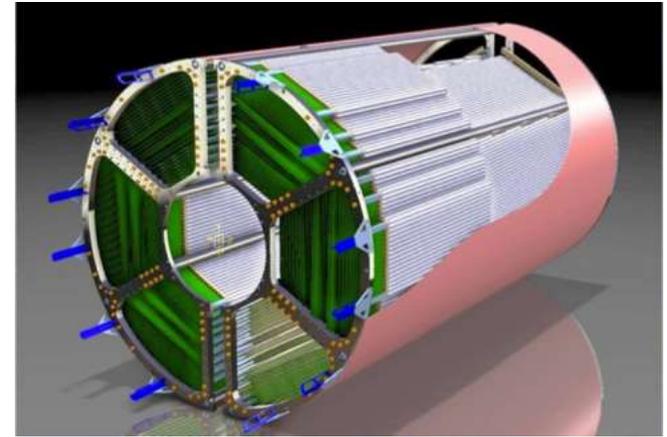

Sub-sistemul PANDA STT Central

- Reconstrucția traiectoriilor ptr. particule încărcate cu impulsul 100 MeV/c- 8 GeV/c;
- dE/dx pentru PID;
- **4636** tuburi subțiri cu drift (Straw Tubes) distribuite în 24- 27 straturi planare;
- împachetate la o distanță de 20 μ m în 6 sectoare de hexagon;
- structura rigidă – se poate auto-sustine (gaz la pres. de 2atm.);

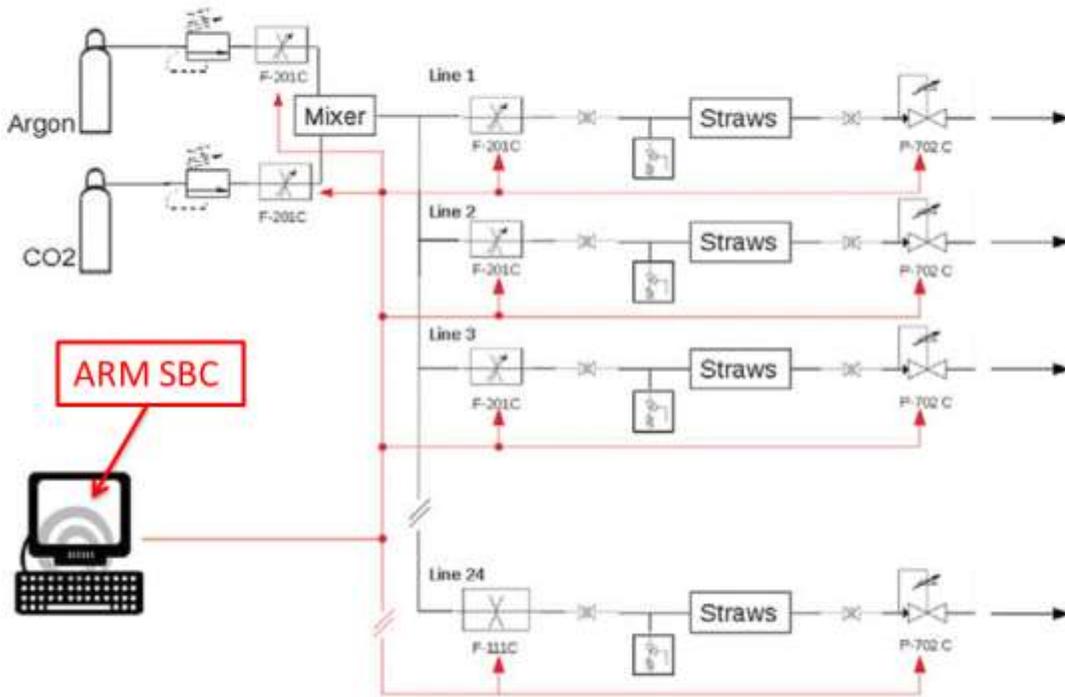

Performanțe:

- $\sigma_{r\phi} \sim 150(100) \mu\text{m}$, $\sigma_z \sim 3.0(2.0) \text{ mm}$ (single hit)
- $\sigma_E/E < 8\%$ for π/K identification
- $\sigma_p/p \sim 1 - 2\%$ at B=2 Tesla
- $X/X_0 \sim 1.2\%$ ($2/3$ tube wall + $1/3$ gas)

Element	Material	X [mm]	X_0 [cm]	X/X_0
Film Tube	Mylar, 27 μ m	0.085	28.7	3.0×10^{-4}
Coating	Al, 2 \times 0.03 μ m	2×10^{-4}	8.9	2.2×10^{-6}
Gas (2bar)	Ar/CO ₂ (10%)	7.85	6131	1.3×10^{-4}
Wire	W/Re, 20 μ m	3×10^{-5}	0.35	8.6×10^{-6}
			Σ_{Straw}	4.4×10^{-4}

Eur. Phys. J. A (2013) 49: 25

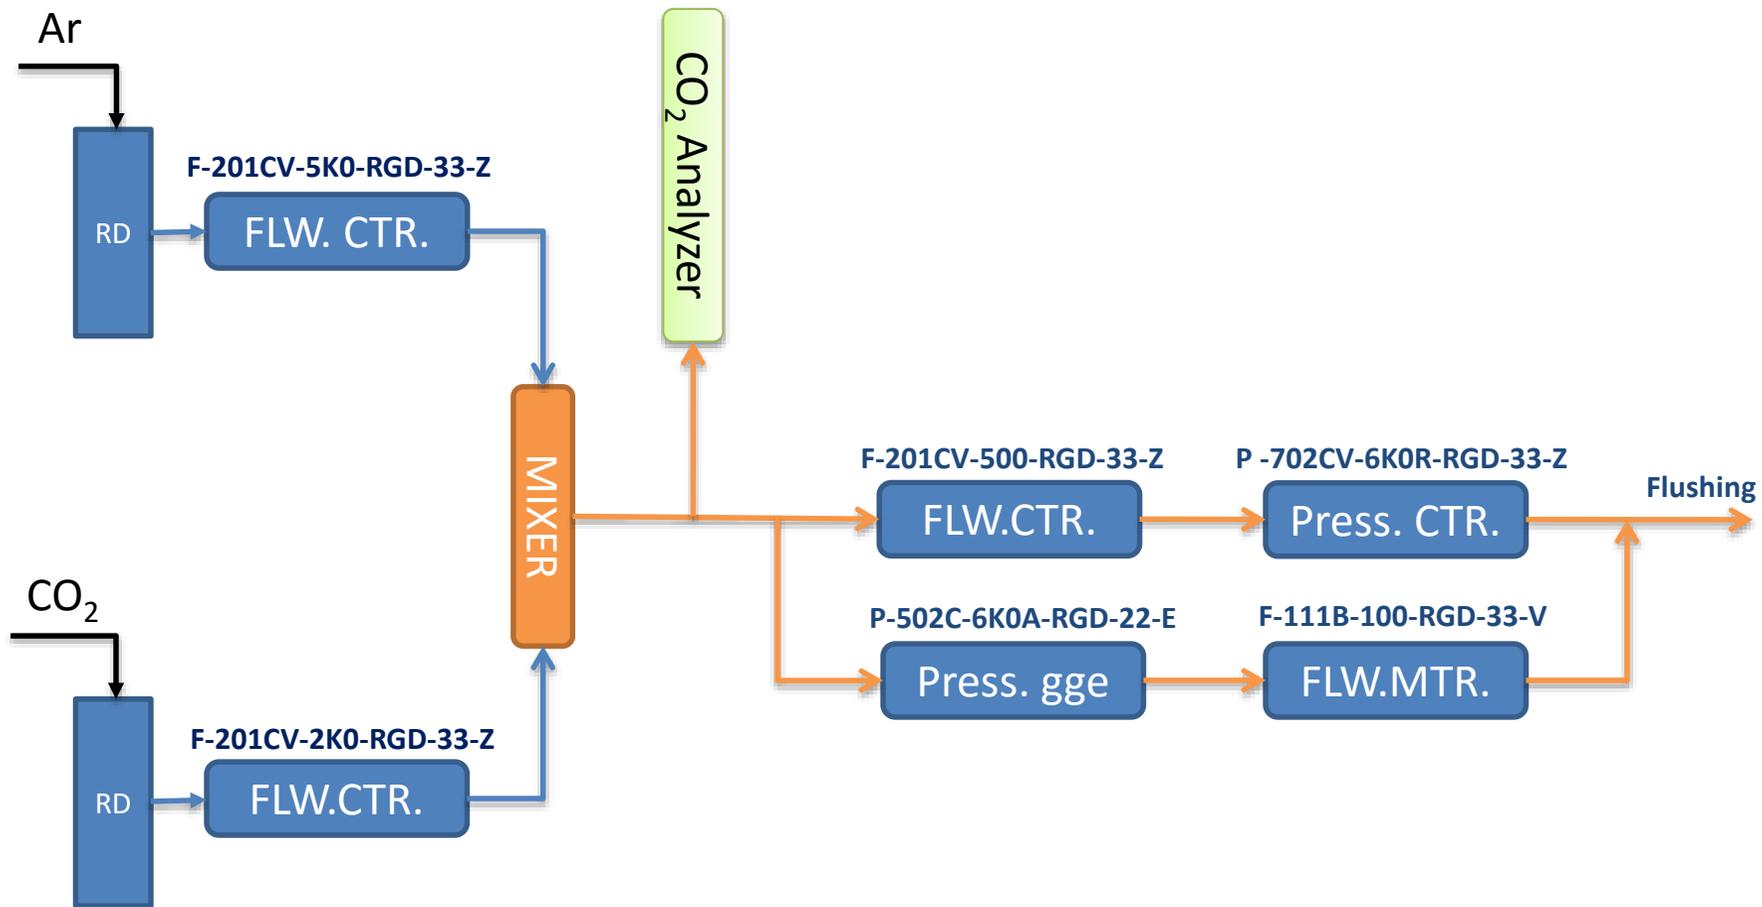

Control lent pentru sistemul de alimentare cu gaz al PANDA STT:

- Amestec Ar - CO₂ (10%);
- 2 x 24 linii de gaz (inlet/outlet);
- 26 (F-201C) controlere debit gaz;
- 24 (P-702C) controlere de presiune

Aranjament experimental de test in IFIN-HH.

STT Gas Control Software (2015)

- The safety of the gas system prototype, built this year, will be improved by the addition of a **CO₂ analyzer (already ordered by IFIN-HH), moisture and O₂ analyzer (INFN-LNF budget) , safety valves and gas temperature monitoring;**
- LabView code will be kept as an expert interface for development and performance testing purposes;
- Final version to run on ARM with EPICS & CSS (prototype in 2015).

Activitati - PandaGrid

PandaGrid – prima componenta functionala din PANDA (2005).
In prezent: situri grid 13 institute, 1400 noduri active, 2,372 PB stocare
IFIN-HH din 2005, 48 noduri de calcul, 1.8 TB stocare

Panda – infrastructura software

Frameworkul - **PandaRoot** este construit pe baza unui cadru de lucru general, comun pentru toate marile experimente de la FAIR, intitulat **FairRoot** si pe un set de biblioteci de programe de utilitate generala folosite in comunitatea HEP, intitulat **external packages**

Activitati:

- reactualizarea periodica a prin instalarea de versiuni noi ale cadrului de lucru PandaRoot si a pachete externe de programe,
- Asigurarea functionarii neintrerupte a sitului din IFIN-HH pentru activitatile de simulare efectuate in sistemul GRID

Rezultate-1

Pandaroot – pachete instalate in momentul de fata

What is this about?

Activitati propuse

- Adoptarea sistemului *git* pentru controlul versiunilor pentru pachetele externe si PandaRoot, in locul sistemului *subversion (SVN)*, folosit pina in prezent, ultima versiune instalata, *oct14* fiind ultima gestionata cu ajutorul sistemului *SVN*.
- Trecerea la versiuni mai noi ale sistemului de operare Linux: SLC6.6, sau CC7 pe serverele sitului PandaGrid din IFIN-HH . Actiunea aceasta este importanta in viitor pentru implementarea sistemului ALFA, un cadru software de lucru comun ALICE-FAIR.
- Cresterea ponderii contributiei sitului PandaGrid din IFIN-HH la activitatile de simulare pentru experimentul PANDA.
- cresterea puterii de calcul prin adaugarea de noduri noi de calcul si marirea capacitatii de stocare
